

Institutions

 This is a beta API and as such the interface is subject to change

An Institution represents a Financial Institution that is supported by Teller.

Properties

`id` string

Teller id of the institution.

`name` string

Name of the institution.

`products` array

List of Teller's products supported for the institution.

`GET` /institutions

List Institutions

Returns a list of all institutions supported by Teller. There is no pagination currently. Doesn't require authentication.

```
curl https://api.teller.io/institutions
```

Response

```
[
  {
    "name": "Chase",
    "id": "chase",
    "products": [
      "verify",
      "balance",
      "transactions",
      "identity"
    ]
  },
  ...
]
```
